CONSUMER PRICE INDEX May 2021

In May 2021, the “All items” annual (year on year) inflation rate stood at 11.37% compared to -0.18% in May 2020. The core inflation index rose by 10.77% over the same period. Month on month, the inflation rate in May 2021 was 0.53% compared to -0.09% in May 2020. The “All items” 12-monthly average inflation stood at 5.01% and the core inflation 6.03%. Increases were recorded in “Other Food” (10.73%) and “Non-Food” (4.29%), whereas a decrease was recorded in “Fish” (-5.19%).

"Your stepping-stone for informed decisions"

1. INTRODUCTION

This issue of the monthly Consumer Price Index presents inflation for the period January 2019 to May 2021. The classification used for presentation of the CPI is the international Classification of Individual Consumption by Purpose (COICOP). Concepts, sources, and methods are given in part 3.

Figures for May 2021 CPI with 2018 as the base period are presented in this bulletin. Table 1(a) presents the monthly CPI for the broad categories (*Fish, Other Food, Non-Food and All Items*) for the period May 2019 to May 2021 and Table 1(b) shows the average index over two twelve monthly periods. Table 2 gives detailed indices by month starting January 2019. Table 3 shows the month-on-month percentage change whilst Table 4 shows the year on year percentage change. Tables 5, 6 and 7 show the quarterly consumer price indices, quarter on quarter changes and quarterly year on year changes respectively. Charts 1 and 2 show the month on month and year on year percentage changes for the broad COICOP categories respectively, whereas Chart 3 shows the contribution to the overall month on month rate of change in prices by major product groups and Chart 4 shows the contribution to the overall year on year rate of change in prices by major product groups. Chart 5 shows the year-on-year rate of change for core inflation indices. Charts 6 and 7 represent the 'quarter on quarter' and 'year on year' percentage change of the quarterly consumer price indices from 2018 till present.

2. RESULTS AND HIGHLIGHTS

The 'All Items' Index in May 2021 stood at 124.36 compared to 111.67 in May 2020. Comparing year on year, this represents an inflation rate of 11.37%. The core inflation index, which excludes fresh fish and energy items (fuel prices and electricity), increased by 10.77% over the same period.

The 'All Items' 12 monthly average inflation stood at 5.01% in May 2021 (Table 1(b)). This is measured as a ratio of the average index over

the 12-month period (June 2020 - May 2021) to the average index of the preceding 12-month period (June 2019 - May 2020). Over the same period, the rate of inflation for 'Fish' was (-5.19%), 'Other Food' (10.73%) and 'Non-Food' (4.29%). The 12 monthly average core inflation stood at 6.03%.

MONTH-ON-MONTH COMPARISON

(Table 3 & Charts 1 & 3)

On a month-on-month comparison, 'Fish' prices decreased (-2.57%) in May 2021 compared to April 2021.

There was an increase in the price of 'Other Food' (0.54%) over the same period. Increases were observed in some sub-categories in this group. The main increases were in, 'Milk, cheese and eggs' (1.34%) 'Oils and fats' (1.21%), 'Sugar, jam, honey and confectionery' (1.19%) and 'Food products n.e.c' (0.89%). Main decreases were observed in 'Fruits' (-1.37%), 'Vegetables' (-0.27%) and 'Fish (Frozen, smoked, salted)' (-0.08%).

In the 'Non-Food' category, an increase (0.57%) was observed in May 2021 compared to April 2021. Main increases were in 'Recreation and culture' (2.45%), 'Housing, water, electricity & gas' (2.20%), 'Clothing and footwear' (0.79%) and 'Furniture & household equipment' (0.49%). Main decreases were observed in Transport (-0.61%), 'Health' (-0.60%) and 'Communication' (-0.09%).

Overall, the 'All Items' Index recorded an increase (0.53 %) in May 2021 compared to April 2021.

An analysis of the contribution to the overall month on month price change by major product groups is given in Chart 3. 'Fish' contributed -0.03%, 'Other Food' 0.07% and 'Non-Food' 0.49%. This shows that movements in the 'Non-Food' category contributed the most to the 'All Items' price change in May 2021 compared to April 2021.

YEAR-ON-YEAR COMPARISON

(Tables 2 & 4 and Charts 2, 4 & 5)

On a year-on-year comparison, the 'Fish' index stood at 72.23 in May 2021 compared to 77.65 in May 2020 reflecting a price decrease (-6.99%).

The 'Other Food' Index stood at 122.92 in May 2021, reflecting a year-on-year price increase (19.00%) compared to May 2020. Increases were recorded in all the sub-categories with the highest increase recorded in 'Meat (Fresh, chilled, frozen)' (30.13%). Other significant increases were recorded in 'Vegetables' (25.17%), 'Oils and fats' (24.98%), 'Milk, cheese and eggs' (20.19%), 'Food products n.e.c' (18.89%) and 'Sugar, jam, honey and confectionery' (17.67%).

In the 'Non-Food' category, the index of 125.62 in May 2021 reflects a price increase (10.50%) compared to May 2020. Main increases were observed in 'Health' (22.30%), 'Furniture & household equipment' (18.88%) 'Transport' (16.15%). 'Housing, Water, Electricity & Gas' (15.88%) and 'Recreation and culture' (15.44%). A decrease was observed in 'Communication' (-2.24%)

An analysis of the contribution to the overall year-on-year price change by major product groups is given in Chart 4. 'Fish' contributed -0.09%, 'Other Food' 2.43% and 'Non-Food' Items 9.02%. This shows that movements in the 'Non-Food' category contributed the most to the 'All Items' price change in May 2021 compared to May 2020.

A comparison between the Core inflation and 'All items' CPI is provided in Chart 5. The year-on-year rate of change of the core inflation index stood at 10.77% in May 2021, compared to the 'All items' inflation rate (11.37%).

QUARTER-ON-QUARTER COMPARISON

(Table 6 and Chart 6)

On a quarter-on-quarter comparison, 'Fish' prices increased by 13.74% in Q1 2021 compared to Q4 2020.

There was an increase in the price of 'Other Food' (9.63%) over the same period. Main increases were observed in 'Meat (Fresh, chilled, frozen)' (16.33%), and 'Oils and fats' (14.02%), 'Vegetables' (13.56%) 'Milk, cheese and eggs' (10.09%) and 'Fruits' (8.50%) in Q1 2021 compared to Q4 2020.

In the 'Non-Food' category, an increase (5.52%) was observed in Q1 2021. Main increases were observed in 'Health' (13.22%), 'Furniture and Household equipment' (11.54%), 'Transport' (9.00%) and 'Housing, Water, electricity & gas' (7.90%). Only 'Communication' showed a decrease of -2.02% in this quarter.

Overall, the 'All Items' Index recorded an increase (6.15%) in Q1 2021 compared to Q4 2020.

QUARTERLY YEAR-ON-YEAR COMPARISON

(Tables 5 & 7 and Chart 7)

On a Quarterly year-on-year comparison, the 'Fish' index stood at 91.17 in Q1 2021 compared to 82.75 in Q1 2020 reflecting a price increase (10.17%).

The 'Other Food' Index stood at 120.15 in Q1 2021, reflecting a quarterly year on year price increase (17.37%) compared to Q1 2020. All sub-categories recorded an increase in prices with main increases observed in 'Meat (Fresh, chilled, frozen)' (33.84%), 'Vegetables' (21.48%) 'Oils and Fats' (21.29%) and 'Sugar, Jam, honey and confectionery' (19.01%), whilst no decrease was observed.

In the 'Non-Food' category, the index of 123.00 in Q1 2021 reflects a price increase (7.30%) compared to Q1 2020. Significant price increases were observed in the following categories: 'Health' (19.39%) and 'Furniture & household

equipment' (15.21%), whilst a decrease was observed in 'Communications' (-2.08%).

Overall, the 'All items' Quarterly Index recorded an increase of 8.63% in Q1 2021 compared to Q1 2020.

The quarter on quarter changes are based on two different baskets of goods and services and the comparison made is between January-March 2021 (new basket) and October- December 2020 (old basket). From June 2021 onwards, the quarterly changes will be based on the new basket and will thus reflect the true change in prices within the new basket.

3. CONCEPTS SOURCES AND METHODS

The CPI measures the rate of price change of a fixed basket of goods and services purchased by Seychelles households. NBS collects about 6,000 price observations monthly across Mahe, Praslin and La Digue.

The CPI is an index or tool which measures price changes in goods and services with reference to a base period for which the index is set to equal 100. Any increase or decrease in this index reflects an increase or decrease in the price of the good or service compared to the price in the base period. Rapid increases in the index imply that the market structure is changing. The movement in index from one period to another can be expressed as a percentage change or changes in index points.

The rate of inflation on the other hand measures the rate at which the cost of a fixed basket of goods and services is changing over time. This is usually measured as a ratio of the average index over a twelve-month period to the average index of the preceding twelve-month period as shown in Table 1(b).

The core inflation index excludes from the headline CPI, the prices of fresh fish and energy items (fuel prices and electricity), which are most subject to transient shocks (e.g., changes in oil prices and seasonal effects). By eliminating these CPI components, this index aims at

capturing the underlying inflationary pressures in the economy.

Price collection is done during the week of the 15th of every month. Any change in price of commodities that occur after the price collection week is reflected in the computations of the following month.

4. NOTE TO USERS

With the index as of February 2021 the CPI has been updated and rebased. Rebasings involved the production of a new CPI index series (2014=100) with new expenditure weights (based largely on the results of the 2018 Household Budget Survey (HBS)) and an updated basket of goods and services. As consumer markets develop and consumer's preferences change, it is essential that the CPI expenditure weights, and CPI basket of goods and services are reviewed and updated to maintain the relevance and accuracy of the CPI.

This new CPI index series will be linked to the previous CPI index series to form a long run CPI time series with an index reference period of 2014=100.

Due to the chain linking process used to achieve the above-mentioned, the year-on-year price changes which compares prices for the same month in two different years (May 2021 to December 2021 compared to May 2020 to December 2020) will also be a comparison between two different baskets of goods and services. It is only as from February 2022 that the new basket will be used for the year-on-year comparison in two adjacent years.

5. UPDATES ON CPI

The metadata and further information on the rebasing of the CPI as well as the general revision and linking of indices can be found on the website at www.nbs.gov.sc

6. NEXT RELEASE

The next issue of the CPI bulletin will be released on Wednesday 7th July 2021.
